**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A good window of dry and bright weather during the day but feeling very cold in the brisk northerly wind during the morning, when gusts of 30-35mph are likely over the high ridges and summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Thu 02 Dec 2021	11.4mm	17.6mm	18.4mm

Forecast for Friday 03 Dec 2021

Weather: Outbreaks of rain overnight, initially snow on the high summits. A misty start to the day with light rain or drizzle. Becoming drier and brighter for a time round the middle of the day but further rain is possible in the late afternoon and evening.

Maximum wind: Southwest 20-25mph with gusts 30-35mph at first, becoming Westerly 10-20mph.

Chance of cloud free mountain/hill tops above 600m: 10% in the morning, becoming 60-70% in the afternoon.

Visibility: Very poor for much of the morning and possibly into the afternoon with cloud down to lower slopes. Cloud lifting and breaking in the afternoon but occasionally lowering to around 500m, particularly during the early evening.

Temperature: **Valleys:** Plus 4C overnight, rising to 10C in daytime, falling to Plus 6C in evening
At 600m: Plus 2C overnight, rising to 5C in daytime, falling to Plus 2C in evening.
Freezing level: Above summits, but close to highest summits in evening.
